

PROSTATE CANCER
impact alliance

The Prostate Cancer Impact Alliance (PCIA) is committed to ensuring that all individuals living with or at risk for developing prostate cancer have access to equitable and affordable health care, regardless of sexual orientation, gender identity, and gender expression. We are alarmed by the recent wave of state-level laws targeting health care for LGBTQ+ patients. We recognize the unique needs and challenges of LGBTQ+ patients and oppose policies that create additional barriers or complications for these patients in accessing equitable and appropriate prostate cancer treatment.
