Dear Friend of the Foundation,

We are pleased to share with you our annual report calendar which highlights our many efforts in urology research, advocacy and education. Our progress and success today would not be possible without the generosity and passion of our many advocates, supporters and urology partners. Your investment in the Urology Care Foundation helped make a measurable impact on the lives of millions touched by a urologic disease.

This past year, the Foundation expanded and enhanced its communication efforts to raise awareness and educate patients and their loved ones, healthcare professionals and the general public on urologic diseases. UrologyHealth.org has grown to be the nation’s leading authoritative go-to resource, providing more than four million patients and their loved ones with valuable information and decision tools about urologic health. Our increasing collections of resources are medically-reviewed and include the most accurate information on over 110 urologic conditions. These valuable resources help patients and their loved ones navigate their health, providing critically needed information on the prevention, early diagnosis and treatment of often life-altering urologic diseases and urologic cancers. The Foundation distributed more than 500,000 patient friendly resources electronically and in print, including expanded distribution of our UrologyHealth extra® quarterly patient magazine to 42 Veterans Centers in 23 states. This magazine is an indispensable resource dedicated to those actively managing their urologic health care and those ready to make direct, positive healthy changes in their lives.

On the state and federal front, the Foundation, in collaboration with the American Urological Association and the Bladder Health Alliance, worked to mobilize support to nationally declare November as National Bladder Health Awareness month. These efforts continue to gain momentum across the country, helping to elevate national awareness about urologic health and diseases.

The Urology Care Foundation research programs also saw unprecedented growth. This calendar year alone, the Foundation committed nearly $2 million to support over 40 early career investigators with research training. The Research Scholar Program—our premier funding opportunity in urologic research—was also expanded in order to maximize the impact of our awards and reach the best and brightest scientists conducting cutting-edge urologic research. As a result, we saw a record-breaking number of applications and a 79% increase over 2015.

We look forward to your continued partnership to ensure the Foundation remains a dedicated leader in the advancement of urologic research and education to improve patients’ lives.

Together, we are ensuring the future of urologic health.

With gratitude,

Richard A. Memo, MD
Chair
Board of Directors
More than 25 million people in the United States suffer from loss of bladder control. Of those, about 75% are women and 25% are men.

Nearly 3 million men in the United States are prostate cancer survivors.

Prostate cancer is the second most common cancer in American men.

BPH affects about 50% of U.S. men between the ages of 51 and 60 and up to 90% of men over 80.

High blood pressure and high blood sugar (diabetes) are two leading causes of kidney disease.

1 in 10 Americans will have a kidney stone at some point in their life.
The Urology Care Foundation is a driving force in the discovery of new treatments because we invest in the next generation of researchers. We do more than fund the best research from talented scientists—we help foster and develop their careers to support a long-lasting commitment to finding breakthroughs in patient care. Funding cuts and increased competition for federal grants continue to threaten the future of urologic research. Your donation helps fund necessary research and supports talented young scientists during critical phases of their careers. These targeted investments ensure that they receive the resources and training for a successful career in research.

Because of you, the Urology Care Foundation has supported more than 750 scientists with nearly $30 million in research funding dedicated to preventing, diagnosing and treating urologic conditions.

Urology Care Foundation research funding since 2010:

- 2010: $432,000
- 2012: $1,808,000

Patient Education

The Foundation is a leader in creating patient education materials on a variety of urologic conditions and treatments, based on the American Urological Association (AUA) clinical guidelines, which set the standards for quality patient care. These resources are regularly reviewed and updated and available free of charge.

Patient Education Materials and Resources

- **UrologyHealth.org** is a leading patient-friendly resource in urology. The redesigned UrologyHealth.org launched in May 2015 with a responsive and intuitive new design—easy for you or your patients to access from a smartphone or tablet.

- **Find-A-Urologist** tool that connects patients with urologists in their area.

- Urologist-reviewed information on more than 100 urologic conditions, treatments and procedures at UrologyHealth.org.

- **Free** printed patient guides, fact sheets, brochures and other tools available to order at UrologyHealth.org.

- **UrologyHealth extra®**, a free patient magazine. The newly redesigned UrologyHealth extra® magazine is a fresh, energetic and valuable resource that features stories about important urologic health and wellness topics, plus provides the latest tips on nutrition, fitness and living a healthy lifestyle.
Sign up for our free Patient Magazine, **UROLOGY HEALTH extra**

- Valuable resources for those actively managing their urologic health care and those ready to make direct, positive, and healthy changes in their lives.
- Delicious and urologic-friendly recipes, plus tips on wellness, nutrition and fitness.
- Latest news, technology and treatments, plus stories about important health and wellness topics covering women’s and men’s urinary, pelvic and sexual well-being.

Sign Up at UrologyHealth.org/UHe
When I was first told I had kidney cancer, I didn’t hear much else. After the initial shock wore off, I learned about my treatment options from the Urology Care Foundation’s education materials, which encouraged me to learn all I could about my disease and treatment and talk to my doctor. Suddenly, I was more optimistic and less frightened—I knew I could make more informed decisions about my care.

–Pete Jenkins, Kidney Cancer Survivor

Your support is making a difference by improving and saving the lives of patients.
Highlights:
• On May 6, 2016, a rockin’ night was had in San Diego at the Foundation’s 2016 Benefit: Rockin’ at the Tin Roof.
• Attendees of the sold out benefit included, NFL Hall-of-Famer, Mike Haynes, Foundation supporters, AUA domestic and international members, residents, patient advocates and industry partners.
• The fun casual evening featured musical entertainment from two popular urologists’ bands Sticks and Stones and The Void. The highlight of the evening was an impressive karaoke style sing-off challenge that had the crowd wanting more!
A Philanthropist Committed to Making a Difference - Kalish Kedia, MD

In 2014, Kalish Kedia, MD of Cleveland Urology Associates made a generous gift to the Urology Care Foundation to endow a new research scholar award. To honor the memory of Dr. Kedia and Mrs. Usha Kedia’s son, the award has been named the Indian American Urological Association and Anupam Ted Kedia Research Scholar Award.

The Kedia’s commitment will ensure that funds are generated to support the discovery and advancement of urologic research for future generations. This endowment will provide, in perpetuity, support for a two-year award for a scientist engaging in urologic research. We are truly grateful for Dr. and Mrs. Kedia’s dedication to furthering the careers of talented early-career investigators.

The inaugural Indian American Urological Association and Anupam Ted Kedia Award was competitively-selected and awarded to Dr. Vijay Samineni, Washington University, St. Louis, in 2016. Dr. Samineni’s project, titled Optogenetic Dissection of Cell Type-specific Roles in Bladder Pain, is using optogenetics to study sensory neurons associated with bladder pain in order to better understand interstitial cystitis.

Special thanks to the Indian American Urological Association and Dr. Kalish Kedia and Mrs. Usha Kedia for your investment in the future of urologic research and care!
“I wanted to make a gift to an organization that I felt connected to and that was conducting promising research and education in the battle against urologic diseases. A planned gift made sense for my financial portfolio and created a good return on investment and tax relief, which allowed me to make my gift to the Urology Care Foundation and support a worthy cause.”

– Adam Tigelman
The Urology Care Foundation’s program expenses fall into two major categories: Research and Education and Outreach.

**Research** grants are awarded to institutions and individuals throughout the United States by the American Urological Association (AUA) Research Department. The AUA Office of Research has a stringent peer-review process that reflects the highest standards of the National Institutes of Health. Each year, the Foundation grants nearly $2 million in research funding to the AUA Research Department in support of training awards, salary stipends and fellowships to promising investigators. Our awards span the career spectrum of research—medical students, residents, post-doctoral and post-resident fellows and independent investigators.

**Education and Outreach** expenditures include our efforts to raise awareness of urologic health through national public health campaigns and publications. The Foundation’s online and print materials are based on information from the AUA’s Clinical Guidelines. Our patient-friendly educational tools are designed to promote communication between patients and their health care providers. We also publish *UrologyHealth extra*, a quarterly magazine.

A copy of the most recent audited financials is available by contacting the Urology Care Foundation. Documents submitted under the Maryland Charitable Solicitations Act are also available from the Maryland Secretary of State, State House, Annapolis, MD 21401 (410-974-5534).
This past year, dozens of corporate, foundation and association donors helped to make a significant difference in the lives of millions of Americans diagnosed with urologic disease through their support of the Urology Care Foundation’s research and education programs. We are grateful for their continued generosity and commitment to the Urology Care Foundation.

Recognizes gifts from May 1, 2015 – May 21, 2016
We are grateful for the support of dozens of corporate, foundation and association donors that made a difference in the lives of those suffering with urologic disease. Together, we are ensuring the future of urologic health.

The work of the Urology Care Foundation in urologic research and education is made possible through the generous support of the following individuals. We are most grateful for your commitment to urology and your generosity. (Recognizes gifts from May 1, 2015 – May 1, 2016.)

</table>
Educating patients.

IT’S A MATTER OF HEALTH, MONEY, AND PEACE OF MIND.

• Poor urologic health is expensive. Americans spend nearly $40 billion annually treating urological conditions.

• Urological conditions are extremely common. Every 2.3 minutes, a man will be diagnosed with prostate cancer; 33 million Americans live with an overactive bladder.

• Urology is widely misunderstood. Despite affecting millions of women and young people, urology is widely perceived just for aging men.

Funding answers.

THE FUTURE OF PATIENTS’ LIVES DEPENDS ON IT.

• Research is responsible for the next cure. Researchers and physician scientists conduct the cutting-edge research necessary to develop new urologic treatments that touch patients’ lives.

• Federal research funding is decreasing. Over the past 15 years, adjusting for inflation, funding from the National Institutes of Health (NIH), one of the largest contributors to urologic research, has decreased by approximately 20%. Support from private sources, such as the Urology Care Foundation, is more critical than ever.

• Urologists are leaving research. With cuts in federal research funding and the demands of conducting research, talented physician scientists are increasingly lost to careers in private or clinical practice. The Foundation fosters careers in research to keep the best and brightest young physicians focused on finding new treatments and cures.

Educating patients.
IT’S A MATTER OF HEALTH, MONEY, AND PEACE OF MIND.
• Poor urologic health is expensive. Americans spend nearly $40 billion annually treating urological conditions.
• Urological conditions are extremely common. Every 2.3 minutes, a man will be diagnosed with prostate cancer; 33 million Americans live with an overactive bladder.
• Urology is widely misunderstood. Despite affecting millions of women and young people, urology is widely perceived just for aging men.

Funding answers.
THE FUTURE OF PATIENTS’ LIVES DEPENDS ON IT.
• Research is responsible for the next cure. Researchers and physician scientists conduct the cutting-edge research necessary to develop new urologic treatments that touch patients’ lives.
• Federal research funding is decreasing. Over the past 15 years, adjusting for inflation, funding from the National Institutes of Health (NIH), one of the largest contributors to urologic research, has decreased by approximately 20%. Support from private sources, such as the Urology Care Foundation, is more critical than ever.
• Urologists are leaving research. With cuts in federal research funding and the demands of conducting research, talented physician scientists are increasingly lost to careers in private or clinical practice. The Foundation fosters careers in research to keep the best and brightest young physicians focused on finding new treatments and cures.
The Bladder Health Alliance, a coalition of groups representing physicians, patients and veterans, is focused on connecting, educating and empowering individuals to take control of their bladder health, as well as advocating for medical and behavioral research funding to better understand and treat bladder conditions.

Members of the Bladder Health Alliance:

- Alliance for Aging Research
- American Geriatric Society’s Health in Aging Foundation
- American Urogynecologic Society
- American Urological Association
- Association for Pelvic Organ Prolapse Support
- Bladder Cancer Advocacy Network
- Blue Thong Society
- Chesapeake Urology Associates
- Healthy Women International
- Society for the Study of Women’s Sexual Health
- Interstitial Cystitis Association
- Men’s Health Network
- Multiple Sclerosis Association of America
- Multiple Sclerosis Foundation
- National Multiple Sclerosis Society
- National Association for Continence
- National Association of Nurse Practitioners in Women’s Health
- Simon Foundation for Continence
- Society for Women’s Health Research
- Spina Bifida Association
- SUFU - Society of Urodynamics, Female Pelvic Medicine & Urogenital Reconstruction
- United Spinal Association
- Urological Association of Physician Assistants
- Urology Care Foundation
- Veterans Health Council
- Women’s Health Foundation
- Wound, Ostomy and Continence Nurses Society (WOCN)

Urology Care Foundation
Board of Directors
The Urology Care Foundation is governed by a multidisciplinary and diverse board, comprised of urologist and public directors. Our Directors were selected through a competitive review process based on their commitment to advancing urologic research and patient care. They contribute invaluable expertise in our efforts to accomplish our mission to improve patients’ lives.

Richard A. Memo, MD
