Advancing urologic research and education to improve patients’ lives.
Dear Friend of the Foundation,

As we reflect on this past year, we are pleased to present to you our 2014-2015 annual report calendar. This annual report represents an entire year of growth and accomplishments. This past year has been exceptional in terms of boosting our sustainability and impact as we announced our new Urology Care Foundation Board of Directors. We have received 13 new endowments to support our commitment to advance urologic research. Our website, UrologyHealth.org, has garnered 4.5 million visitors this past year, an increase of more than 2.5 million from the previous year. The Foundation, supported by the loyalty of our committed partners and donors, remains a leading advocate for patients, researchers, health care professionals and caregivers.

In 2015, we are celebrating our 40-year history of funding urologic research early career investigators. Since 1975, we have supported and ignited the careers of nearly 600 researchers, totaling over $20 million in awards and scholarships. Our early career investigator training programs and awards are a highly regarded and much-desired opportunity for young scientists to begin a strong career in urologic research. We are incredibly grateful for your continued support, which has not only sustained this program, but driven its success. We look forward to the bright future of the Foundation, with a positive outlook for many years to come.

The Urology Care Foundation is raising awareness through a series of national public health campaigns to address some common urologic concerns: Overactive Bladder (It’s Time to Talk about OAB), Stress Urinary Incontinence (It’s Time to Talk about SUI) and Prostate Cancer (Know Your Stats About Prostate Cancer®). Since its inception in 2008, our Know Your Stats® campaign has garnered more than 600 million media impressions, allowing us to reach a vast audience with critical messages and resources.

This annual report reflects our accomplishments as a dedicated leader in advancing urologic research and education to improve patients’ lives, as well as our vision and goals for the future. Generous supporters like you are vital to sustaining the progress our organization has made in the field of urology and our commitment to ensuring a better future for those who suffer from urologic diseases. We thank you again for your support, commitment and dedication.

Together, we are ensuring the future of urologic health.

Gratefully,

Michael T. Sheppard, CPA, CAE
Executive Director

Mission

The Urology Care Foundation is the world’s leading nonprofit urological health foundation — and the official foundation of the American Urological Association. We partner with physicians, researchers, health care professionals, patients, caregivers, families and the public to support and improve the prevention, detection and treatment of urological diseases through research and education.

Vision

To support urological research, and to be the premier provider and resource for the most current, comprehensive and reliable urologic health information for patients and the public.

2014-2015 Research Scholars

Awarded Research Scholars at major institutions throughout the United States and Canada are highlighted on this map.

Peter Chang, MD
Beth Israel Deaconess Medical Center (Boston, MA)

Timothy Daskich, MD
University of California, San Diego (San Diego, CA)

Shankar Paranjpye, PhD
University of South Carolina (Columbia, SC)

Sangunanthaikun Subhashchandrabose, PhD
University of Michigan (Ann Arbor, MI)

Flamina Talei, MD, PhD
Columbia University Medical Center (New York, NY)

Dan Wang, PhD
University of Pittsburgh (Pittsburgh, PA)

Christopher Bartleson, MD, PhD
Wayne Cornell Medical College (New York, NY)

Christopher Filsen, MD
University of California, Los Angeles (Los Angeles, CA)

Philip Ho, MD
University of Texas M.D. Anderson Cancer Center (Houston, TX)

Mark Preston, MD
Harvard School of Public Health/Massachusetts General Hospital (Boston, MA)

Matthew Riesz, MD
Vanderbilt University (Nashville, TN)

Neal Rowe, MD
University of Western Ontario (London, Canada)

Anthony Schaeffer, MD
Boston Children’s Hospital (Boston, MA)

Dana Weiss, MD
Children’s Hospital of Philadelphia (Philadelphia, PA)

Jennifer Bishop, PhD
University of British Columbia (Vancouver, Canada)

Saunders Chang, PhD
University of California, San Francisco (San Francisco, CA)

Arinmid Ghosh, PhD
University of Alabama at Birmingham (Birmingham, AL)

Johanna Harran, PhD
Johns Hopkins Medical Institutes (Baltimore, MD)

Malherita Kaye, PhD
University of Pittsburgh (Pittsburgh, PA)

Dirk Lange, PhD
University of British Columbia (Vancouver, Canada)

Philip Abboob, MD, PhD
Fox Chase Cancer Center (Philadelphia, PA)

Judy Cho, MD
University of California Los Angeles (Los Angeles, CA)

Catherine Gordon, PhD
Stanford University (Palo Alto, California)

Chinmay Misra, MD
University of Texas MD Anderson Cancer Center (Houston, TX)

Irina Debnath, PhD
University of California San Francisco (San Francisco, CA)

Shu Lin, PhD
University of California Los Angeles (Los Angeles, CA)

Tomasz Owczarek, PhD
Columbia University Medical Center (New York, NY)

Bharathraj Rajagopalan, PhD
Rutgers Biomedical Health System (Piscataway, NJ)

Sungyong You, PhD
Cedars-Sinai Medical Center (Los Angeles, CA)
The Urology Care Foundation provides reliable, easy-to-understand patient education materials on a variety of urologic conditions and treatments, based on American Urological Association (AUA) Clinical Guidelines. These resources are regularly reviewed and updated, and available free of charge.

Patient Education Materials and Resources:
- An online Find-A-Urologist tool that connects patients with urologists in their area
- Information about more than 140 urologic conditions and treatments on UrologyHealth.org
- Free printed patient guides, fact sheets, brochures and tools
- UrologyHealth extra®, a free patient magazine with the latest news in urologic health

Order free patient information UrologyHealth.org/Order or call 1-800-828-7866
What is a UTI?

About 8 percent of girls and 2-3 percent of boys have had a urinary tract infection (UTI) by the time they are 5 years old. UTIs are caused by bacteria infecting the urinary tract – the organs and tubes in our body that make, store and pass urine. The urinary tract is made up of the kidneys, ureters, bladder and urethra. Bacteria are not normally found in urine. However, they can enter the urinary tract from the skin near the anus. UTIs are more common in girls than boys. In girls, the opening of the urethra is closer to the anus and the length of the urethra is shorter. Infections are more common in the urethra and bladder, which make up the lower part of the urinary tract. Infections that move up the ureters to the kidneys can be more serious. If left untreated, these infections may lead to kidney failure.

Signs and Symptoms

UTIs are easier to spot in older children who are toilet-trained and can talk about their symptoms. Some signs of a UTI are:

• pain, burning, or a stinging sensation when urinating
• frequent urination or feeling an increased urge to urinate, even without producing urine
• foul-smelling urine that may look cloudy or contain blood
• fever
• low back pain or pain in the area of the bladder

The clearest sign of a UTI in babies may be a fever. Babies with UTIs may also act fussy, vomit and feed poorly. If the UTI becomes a kidney infection, the child or infant is more likely to have a fever with shaking chills, pain in the back or side, or vomiting.

Diagnosis and Treatment

Your child’s health care professional will take a urine sample to test for a UTI. Older children will most often be asked to urinate in a sterile cup. Babies and small children in diapers may need a catheter (tube) to collect urine. The catheter keeps the sample from being contaminated by bacteria on the skin. The urine will then be tested for bacteria. The type of bacteria found may help decide the best drug to treat the UTI, usually antibiotics. It is important for your child to take the entire course of antibiotics to avoid a Recurrent UTI.
The Urology Care Foundation is proud to announce that we've received 13 new endowments for our Research Scholars Program. Our endowments represent our sustainability and growth as an organization as they ensure that our programs will be in existence for many generations. Each of these endowments provides $1.5 million to support a one-year or two-year Research Scholar Award in perpetuity.

We would like to recognize our new endowment donors. Through their contributions, they are establishing a legacy for the next generation of early career investigators, supporting the innovative discoveries of the future. Please join us in thanking our donors for their impactful contributions for mentored research training in urology.

- Western Section of the AUA (WSAUA) – this is the second award endowed by the WSAUA. www.wsaua.org.
- Endourological Society – two awards were endowed; the Endourological Society Research Scholar Award and the Endourological Society/Raju Thomas, MD Award. www.endourology.org.
- North Central Section of the AUA (NCSAUA) – endowed their second Research Scholar Award. www.ncsaua.org.
- Sexual Medicine Society of North America (SMSNA) – this is the first award endowed by the SMSNA. www.smsna.org.
- Indian American Urological Association (IAUA) – two awards were endowed: the IAUA/Sakti Das, MD Research Scholar Award and the IAUA/Kalish Kedia, MD Research Scholar Award. www.iauanet.org.
- South Central Section of the AUA (SCSAUA) – this is the second Research Scholar Award endowed by the SCSAUA. www.scsauanet.org.
- Society of Urologic Oncology (SUO) – two awards in urologic oncology were endowed by SUO. www.suonet.org.
- Northeastern Section of the AUA (NSAUA) – This is the second award endowed by the Northeastern Section of the AUA. www.nsaua.org.
The AUA and the Urology Care Foundation are paving the way for advancements in urological research and patient care through scholarly exchange. Each year we host scientific meetings and workshops to educate researchers on state-of-the-art science and novel research techniques. In addition to the educational value of the science presented at the meetings, researchers and surgeon-scientists greatly benefit from the opportunities to network with other investigators to discuss techniques, exchange information on resources such as data and tissue registries, and build future collaborations to advance urologic research and find cures.

Our research conferences include the following:
- Basic Science Symposium
- Urologic Oncology Symposium
- Research Forum
- Early Career Investigator Workshop
- Summer Research Conference
In 2015, the Urology Care Foundation and the AUA will celebrate our 40-year history of supporting urology research. In that time, over $20 million has been invested to fund and educate more than 600 of the best urologist-scientists and basic scientists. The combined effort has allowed the AUA and Urology Care Foundation to lead the way in urologic research and education to improve patients’ lives.

Many of the key advances in research that are improving treatment options for patients today have resulted from the work of individuals trained in research through Foundation scholarships. For each dollar invested, Foundation scholars received $19.75 in subsequent federal and other grant monies—nearly a 20:1 return! We are projected to fund 64 projects and awards totaling over $1.2 million in 2015. Thank you for your continued support as we reach this monumental accomplishment. Without you, this wouldn’t be possible.

National Nurses Day May 6
Women’s Health Week May 10-16
AUA Annual Meeting in New Orleans, LA May 15-19
Each year, the Urology Care Foundation receives many more applications for Research Scholars Awards than can be supported through current funding sources (see bar chart). Therefore, the Foundation remains diligent and dedicated to fostering partnerships with both current and new donors to increase support for urologic research and continue to make a positive impact for all patients suffering from urologic conditions.

2012-2014 Research Scholar Applications and Awards by Classification
Patients don’t have to suffer in silence.

Many patients, especially those who are older or female, are reluctant to talk about their urologic symptoms. The Urology Care Foundation is raising awareness through a series of national public health campaigns to let patients know they are not alone, and there is help. In addition to reaching recently diagnosed patients, these campaigns are aimed at people dealing with symptoms in silence and those most at risk. We help patients take an active role in their care.

- Educates millions on the facts of overactive bladder (OAB)
- Helps patients manage symptoms
- Over 1.2 million OAB educational resources distributed to patients and health care providers

www.UrologyHealth.org/OAB

- Provides resources for stress urinary incontinence (SUI)
- Encourages conversations with health care providers
- Helps patients better understand their condition

www.UrologyHealth.org/SUI

- Encourages men to learn their risks for prostate cancer
- Reaches out to men and their loved ones (600 million media placements)
- Targeted messages for men at high risk (African-Americans/men with a family history)

www.KnowYourStats.org

Last May, the Urology Care Foundation launched its inaugural Patient Advocacy Hub in collaboration with 16 different patient advocacy organizations. Each organization, who raise awareness and provide support for those with urologic conditions, were given booth space as part of the Foundation’s dynamic 2014 AUA Annual Meeting presence in Orlando.

In addition to connecting with meeting attendees, patient advocates had an opportunity to meet face-to-face with key leaders of legislative priorities in urology. This initiative was made possible through the generous support from Allergan and Astellas.

The Urology Care Foundation thanks 2014 Patient Advocacy Hub Participants:
• Association for Pelvic Organ Prolapse Support
• Association of Peyronie’s Disease Advocates
• Bladder Cancer Advocacy Network
• Caregiver Action Network
• FrankTalk.org—Erectile Dysfunction Foundation
• Interstitial Cystitis Association
• Kidney Cancer Association
• Men’s Health Network
• National Alliance of State Prostate Cancer Coalitions
• National Association for Continence
• Prostate Conditions Education Council
• Prostate Health Education Network
• Simon Foundation for Continence
• United Spinal Association
• Us TOO International Prostate Cancer Education and Support Network
• ZERO—The End of Prostate Cancer

Special Thanks to
Chesapeake UROLOGY
The most personal care for life’s most personal issues.
for their sustained support and commitment to the Urology Care Foundation’s research scholar awards program!

Chesapeake Urology Associates’ annual fundraising efforts through the Baltimore ZERO Prostate Cancer Challenge have raised more than $1 million over the past few years. It’s led to establishing the Chesapeake Urology Prostate Cancer Fund, a permanent research scholar award at the Urology Care Foundation.

Thank you to Dr. Sanford Siegel, Chesapeake Urology Associates and the ZERO Prostate Cancer Challenge for helping to make an impact on the present and future of urologic research.

Prostate Cancer Awareness Month
ZERO Prostate Cancer Run
Towson, Maryland, event to benefit the Urology Care Foundation
For the past six years, the Urology Care Foundation has teamed up with the NFL to raise awareness through the Know Your Stats About Prostate Cancer® campaign. Visit KnowYourStats.org to learn more.

The Know Your Stats® campaign is a rallying force to connect, educate and inspire men across the country to know their risk and talk to their doctor about whether prostate cancer testing is right for them. Now entering its sixth season, the campaign has been seen by more than 100 million Americans since its inception in 2009.

Urologists treat a number of conditions associated with the bladder, including incontinence, Interstitial Cystitis, Recurrent Urinary Tract Infections, and bladder cancer. The Urology Care Foundation supports critical research and research education in these conditions.

In just the past two years, the Foundation has committed more than $1 million in research grants to support 17 projects associated with bladder health!

In addition, the Foundation has provided support to the AUA Office of Research to host workshops and symposia covering bladder-related topics.

Nearly 500 urologists and researchers have attended these educational forums to learn about innovative research from the world’s top scientists.

The Office of Research also advocates for additional federal funding for bladder health research a key priority in urology research.

OVERACTIVE BLADDER PATIENT ADVOCACY ROUNDTABLE

Eighteen groups participated in a 2014 roundtable held at AUA headquarters to help identify needs and gaps of overactive bladder (OAB) patients. OAB is a common health concern, affecting 30 percent of men and 40 percent of women in the United States, making this roundtable a vital contribution to women and men’s urologic health. OAB symptoms can get in the way of your work, social life, exercise and sleep, and can often lead to feelings of embarrassment. Through these roundtable discussions and collaborations with patient advocates, we are helping OAB patients take control of their life by managing their symptoms.

Formation of a NEW Board of Directors

The Urology Care Foundation announced the formation of its new, multidisciplinary, diverse and dynamic Board of Directors in March 2014. The organization’s governance structure includes three public directors, two AUA member urologists, the AUA’s treasurer and a chair. The extensive knowledge of this group will be invaluable as the Foundation forges ahead in its efforts to pave a way for advancements in urologic research and patient care.

Chair
Richard A. Memo, MD, FACS

Secretary/Treasurer
Steven M. Schlossberg, MD, MBA

AUA UROLOGIST MEMBERS-AT-LARGE

Martin Dineen, MD, FACS
John B. Forrest, MD, FACS

PUBLIC MEMBERS-AT-LARGE

Thomas Cavalier
Sam Covelli
John Hirschbeck

Leave a Legacy

The Urology Care Foundation offers a wide range of vehicles to invest in our mission and leave a legacy to impact the future of urology. With a planned or legacy gift, you will make a difference in urologic patients’ lives, present and future.

If you are considering a planned or legacy gift, there are several options for you that offer substantial tax benefits and include, but are not limited to, the following:

• Making a bequest by Will.
• Donating appreciated assets, including stocks, bonds, or making the Foundation the beneficiary of a qualified retirement plan.
• Donating real estate.
• Establishing a charitable trust.
• Giving a gift of life insurance, trusts and other deferred gifts.

For more information, please contact our Major Gifts and Planned Giving Manager Wendy Taylor at 410-689-4034 or wtaylor@UrologyCareFoundation.org.
We present to you our 2014–2015 Research Scholars! Thanks to your generosity, these talented, early career investigators are advancing the field of urology through the exploration of cures and treatments.

A copy of the most recent audited financials is available by contacting the Urology Care Foundation. Documents submitted under the Maryland Charitable Solicitations Act are also available from the Maryland Secretary of State, State House, Annapolis, MD 21401 (410-974-5534).
Since its inception, the Foundation has provided more than 600 grants and awards totaling over $20 million in support of researchers at leading medical institutions across the country.

CORPORATE SUPPORTERS

This past year, dozens of corporate, foundation and association donors helped to make a significant difference in the lives of millions of Americans diagnosed with urologic diseases through their support of the Urology Care Foundation’s research and education programs. We are grateful for their continued generosity and commitment to urology.
