WE’RE ON A global mission!

2020 ANNUAL REPORT

Urology Care FOUNDATION™
The Official Foundation of the American Urological Association
The Urology Care Foundation is the world’s leading nonprofit urological health foundation. The Foundation strives to: provide current and reliable urologic information for the public; fund young scientists carrying out research advancing our ability to find cures for urologic conditions and disease; and support global humanitarian efforts. We are so grateful for our generous supporters, like you, who are helping us advance our mission of ultimately improving urologic health worldwide.

2020 was full of unimaginable challenges and losses, yet throughout these demanding times we found ourselves to be resilient, continuing to further our creativity and resourcefulness to advance our mission.

I am pleased to present to you the Urology Care Foundation’s 2020 Annual Report. This report highlights the incredible undertakings and success stories of the Urology Care Foundation in 2020, including how we made a difference in urological care by funding research, supporting global humanitarian efforts, developing even more patient education materials in many languages and pursuing philanthropic support. The pages that follow demonstrate our strong commitment to this mission.

These accomplishments could not have been achieved without the tireless efforts of our members, volunteers, staff and Board of Directors. Our commitment to making a global impact has never been stronger. On behalf of the Board, I want to thank you all for your hard work and generous support as we continue our global mission, support research and educate our patients.

Harris M. Nagler, MD
Urology Care Foundation President
The Urology Care Foundation launched a new Humanitarian awards and grants program in May of 2020 to recognize and support those who provide urologic humanitarian work in underserved communities around the globe. As part of our mission, the Foundation realizes a critical need to identify and encourage the humanitarian work in an effort to eliminate health care disparities. The impact will go beyond the mere physical, providing hope, dignity and quality of life.

HUMANITARIAN RECOGNITION AWARD

The Urology Care Foundation Humanitarian Recognition Award acknowledges an individual for demonstrated commitment to improving access to quality urologic health care in underserved populations. This award will be bestowed upon an individual who exemplifies this spirit of philanthropy as evidenced by prior humanitarian work.

HUMANITARIAN GRANT PROGRAM

The Urology Care Foundation Humanitarian Grant Program supports the outstanding efforts of individuals and projects that provide direct urologic patient care to individuals and communities in underserved areas, either within or outside the United States.

HUMANITARIAN ENDOWMENTS

To support our vision to be the leader in improving health care for urologic patients worldwide, the Urology Care Foundation has established a series of Humanitarian Endowments that will generate grants annually to support individuals who provide direct urologic patient care to underserved communities in the United States and around the globe. The Foundation would like to thank our generous supporters for the following endowments:

- American Urological Association/UCF Humanitarian Endowment
- Richard J. Fox Foundation Humanitarian Endowment
- Nathirmal N. Lalchandani Humanitarian Endowment
- Endourological Society/Raju and Ginny Thomas Humanitarian Endowment
- The Amerson Family Humanitarian Endowment
WE’RE ON A global mission WITH RESEARCH
The Urology Care Foundation supports research aimed at helping millions of men, women and children who struggle with urologic cancer and disease.

Since 1975, the Foundation has supported more than 850 outstanding young scientists with more than $34 million in research funding dedicated to preventing, diagnosing and treating urologic conditions.

The Foundation is a driving force in the discovery of new treatments, because we invest in the next generation of researchers. Our research has grown to include a whole new approach to both women’s and men’s urologic health and has led to better care, treatments and an improved quality of life for millions of people around the world.

$1.5 M
IN FUNDING PROVIDED TO 75+ YOUNG RESEARCHERS

The Foundation not only funds the best research from talented scientists, but also helps to foster and develop their careers to support a long-lasting commitment to finding breakthroughs in patient care.

5
RISING STARS IN UROLOGY RESEARCH

Physician scientists discovering new ways to improve patients’ lives through research, such as improving the detection of aggressive prostate cancer by combining MRI techniques with urine biomarkers in patients with newly diagnosed prostate cancer.
RESEARCH SCHOLAR AWARDS
Young investigators working alongside, and being mentored by, established researchers in studies spanning from investigating the role of two newly-discovered cell types that may contribute to treatment resistance in patients with benign prostatic hyperplasia, to creating a tissue-engineered urethra to improve surgical treatment options for hypospadias and urethral strictures.

RESIDENCY RESEARCH AWARDS
Urology residents preparing for a career in urologic research conduct studies ranging from exploring the effects of the microbiome on penile cancer outcomes to developing a symptom-based questionnaire for patients with non-muscle invasive bladder cancer who are undergoing intravesical therapy, in order to better understand and improve quality of life.

SUMMER MEDICAL STUDENT FELLOWSHIPS
Giving outstanding medical students an opportunity to explore urologic research through projects such as assessing opioid use during kidney stone treatment and examining the influence of race on access, use and outcomes of assisted reproductive technologies.

UROLOGY RESEARCH EXPERTS
More than 50 urology research experts are involved in advising the Urology Care Foundation to ensure each of its research award programs support studies with the greatest potential to improve patient care.
The Nathirmal N. Lalchandani Summer Medical Student Fellowship award was announced in April 2020, following a rigorous peer-review process conducted in February of 42 applications. The Foundation was delighted to announce that we identified a highly meritorious candidate for this inaugural award, Yash Soni, a second-year medical student at the University of Miami who began his research project in summer of 2020. Mr. Soni’s project, titled “Therapeutic potential of nitric oxide signaling pathway agonists against castration resistant prostate cancer,” was conducted under the mentorship of Himanshu Arora, PhD and Ranjith Ramasamy, MD. Mr. Soni’s study explores the therapeutic potential of Tadalafil on castration-resistant prostate cancer. Previous studies have shown that S-nitroso glutathione (GSNO), which uses a similar molecular pathway as Tadalafil, is effective against this form of prostate cancer. Results of this study will provide important information on the therapeutic applicability of Tadalafil as an anti-prostate cancer drug.

The Foundation wishes to convey its deepest gratitude to the Lalchandani family for establishing the Nathirmal N. Lalchandani Research Endowment to fund a Summer Medical Student Fellowship award in perpetuity.
THE UROLOGY CARE FOUNDATION FUNDED

13

DISEASE/CONDITION AREAS IN 2020:

- BLADDER CANCER
- URINARY INCONTINENCE
- MALE REPRODUCTION AND INFERTILITY
- PROSTATE CANCER
- OVERACTIVE BLADDER
- SEXUAL DYSFUNCTION
- URINARY TRACT INFECTION
- PENILE CANCER
- NEUROGENIC/ UNDERACTIVE BLADDER
- KIDNEY CANCER
- DEVELOPMENTAL ABNORMALITIES
- BENIGN PROSTATIC HYPERPLASIA
- URINARY STONE DISEASE
“The Urology Care Foundation is doing a wonderful job stewarding opportunities for health equity and diversity and has made an instrumental difference in my career through a research scholarship that provided me unique opportunities to give devoted time to become a surgeon scientist and make a difference in patient’s lives. It is exhilarating to be a part of the Foundation’s mission and humanitarian efforts.”

WE’RE ON A GLOBAL MISSION WITH PATIENT EDUCATION
The Urology Care Foundation has been on a global mission to increase visibility and awareness of our immense portfolio of patient education materials. With more than 500 total pieces, the Foundation remains the single largest library of urology-specific patient education in the world.

In 2020, the Foundation launched a new version of our website, UrologyHealth.org, featuring a more dynamic interface, easier navigation, a more user-friendly experience and tighter compliance with Web Content Accessibility Guidelines and American Disabilities Act protocols. Visitors to the site grew to more than 11.3 million - nearly double all visits in 2019!

Together with our Public Education Council and six Patient Education Committees, we developed, reviewed and updated more than 240 educational materials – 141 English and 103 translated. Our translated materials helped to expand our global presence by growing our library of translated materials to include a total of eight languages: Arabic, Brazilian Portuguese, English, Hindi, Italian, Punjabi, Spanish and Urdu.

From fact sheets, patient guides and magazines to podcasts and videos, our educational materials can be ordered or downloaded free from our website. Our resources remain the go-to place for patients and caregivers as well as health care providers for reliable, clinically approved information about urologic conditions and disease.

A highlight of 2020 was the introduction of the latest piece in our Living Healthy series: The Living Healthy Cookbook with Information about Urologic Cancers. This cookbook was designed to help patients and caregivers think about what to eat and to help select meals while dealing with cancer. With support from Pfizer Oncology, this cookbook is available for free, so anyone may explore delicious and nutritious meals, including special recipes developed by celebrity chefs.

The Urology Care Foundation would like to give a special thanks to the following generous donors who made the new Hindi and Punjabi patient educational resources possible:

- Drs. Satinder and Harbhajan Ajrawat
- Sawhney Family Foundation
- Ram and Sita Lalchandani in honor of Nathirmal N. Lalchandani

Dr. Prithvipal Hanspal
Our award-winning magazine, *UrologyHealth extra®,* is designed to make a difference in the daily lives of patients and caregivers. Offering a balance of clinical information, recipes and tips for managing overall health, this magazine is easy for patients, caregivers and the general public to read. Health care professionals rely on this magazine as a trusted physician-led education tool. Our AUA member urologists, advanced practice providers, allied health care professionals, residents and non-urologist MDs, value *UrologyHealth extra®* to provide information which is always reliable and current.

Quarterly releases of *UrologyHealth extra®* reached nearly 245,000 including print and digital copies. With the generous support of Astellas, we were able to make a difference by developing a special women’s bladder health edition of *UrologyHealth extra®* dedicated to helping women of all ages better navigate their bladder health.

“The Urology Care Foundation produces educational materials on a wide variety of topics for urology patients. From written materials, to podcasts, to videos there is something for everyone on the Foundation’s website. These materials are now also available in eight different languages making the Foundation the global leader in patient education in urology.”

- Brian Stork, MD, Chair of the Urology Care Foundation Public Education Council
WE’RE ON A global mission WITH OUR COMMUNITY

- Wound, Ostomy and Continence Nurses Society (WOCN)

ANNUAL UROLOGY ADVOCACY SUMMIT

The Annual Urology Advocacy Summit was held virtually in 2020 but that didn’t stop the Urology Care Foundation from its continued support of the AUA’s legislative priorities through participation in patient centered messaging. Representatives from the Foundation brought a patient approach to discussions on prostate cancer health disparities, urologic research, COVID-19 telemedicine usage and state advocacy.

This year, physicians, patients and research advocates participated in more that 150 virtual meetings with congressional offices, discussing key pieces of legislation for telehealth and rural access. Conversations also addressed the appreciation for supporting urologic research and highlighted current opportunities and challenges in urologic research for future collaboration and aligning research agendas.

PATIENT ADVOCACY CONNECTIONS PROGRAM

With the cancelation of AUA’s 2020 Annual Meeting due to COVID-19, the seventh annual Patient Advocacy Connections Program (PACP) transitioned to align with the AUA’s Annual Urology Advocacy Summit. The newly revised virtual program was an interactive meeting that provided participants the opportunity to generate conversations and dialogue about key legislative issues during two roundtable discussions. Additionally, this year’s program provided the opportunity for patient advocacy groups to meet with AUA Leadership in small groups to continue networking opportunities virtually. The program hosted more than 50 participants representing 35 urology-focused patient advocacy organizations.
More than 75 participants representing patient, physician and research advocacy organizations convened virtually on October 6 and 8 for the 8th Annual AUA/UCF Bladder Health Alliance Roundtable program. Alliance members meet annually to raise awareness and remove stigma associated with conditions impacting bladder health. The 2020 Roundtable program focused on bladder health efforts and research coordination among NIH Agencies; stigma and approaches to overcoming adversity; dealing with post-diagnosis emotion; mental and sexual health issues; and informed decision making.

The roundtable’s premier panel hosted an extraordinary group of presenters who highlighted bladder health research taking place at the National Institutes of Health (NIH). Panelists, representing the National Institute on Aging, National Institute of Child Health and Human Development, National Institute of Diabetes and Digestive and Kidney Diseases, National Institute of Neurological Disorders and Stroke and the National Institute of Nursing Research, shared recommendations for how the advocacy community can stay apprised of upcoming research projects and opportunities to engage with the NIH.

In addition to raising awareness throughout Bladder Health month in November, the Urology Care Foundation hosted its third annual Bladder Health Month Day of Thanks on November 12, 2020. The day provided outreach and awareness to the public about bladder health conditions and thanked individuals who work to improve the quality of life of patients living with bladder health conditions.
The 2020 Dr. Sanford J. Siegel Prostate Cancer Virtual Celebration was held on September 13, 2020 but this year’s community celebration was held online to make sure that supporters, patients, survivors and their loved ones were safe from the spread of COVID-19. “Now more than ever prostate cancer patients need your help during this time as the outbreak adds health risks, stops treatments, and multiplies financial pressures. Funds raised by the ZERO Run/Walk give direct support to patients in your community, a critical lifeline when they need it most,” remarked Dr. Siegel during the virtual celebration.

The Foundation joined forces with Dr. Sanford J. Siegel, longtime Foundation supporter, Urology Care Foundation Board Member and champion in our ongoing partnership with Chesapeake Urology/ United Urology Group which hosts the Annual ZERO Prostate Cancer Run/Walk in Baltimore, MD. In its 14th year Run/Walk is the largest and highest grossing race in the ZERO Prostate Cancer Run/Walk series across the country. The Foundation truly values our ongoing partnership with Dr. Sanford Siegel and the Chesapeake Urology/United Urology Group and Zero who have raised over $2.3 million to fund the Urology Care Foundation Chesapeake Urology Prostate Cancer Research Endowments. The Chesapeake Urology Associates Sanford J. Siegel, MD Prostate Cancer Research Fund was established to advance prostate cancer research. A second fund the Chesapeake Urology Associates /United Urology Community-Based Research to Advance Prostate Cancer Care program, was established to bring together the expertise and resources to help develop collaborations with private practices, academic research institutions and industry stakeholders to support prostate cancer care and research initiatives.
Each May the Urology Care Foundation hosts an annual silent auction which coincides with the AUA Annual Meeting; however, this year’s meeting was cancelled much like so many events due to the pandemic. The Foundation didn’t want everyone to miss out on the fun and all the great auction packages we had procured from our loyal donors — signed sports memorabilia, art, jewelry and so much more.

The Inaugural Virtual Auction was held instead in November just in time for the holidays. A win-win proposition for our supporters to contribute to the Urology Care Foundation’s research, education and humanitarian programs and take a chance on unique and luxury items. The new virtual format for the auction provided great visibility and reached nearly 33,000 inboxes and more than 40,000 impressions through social media channels. Be sure to look out for the 2021 Virtual Auction in September.
WE’RE ON A

global mission
WITH OUR
STEWARDSHIP
Financial highlights of 2020 may be summarized by the Urology Care Foundation’s two major categories:

**RESEARCH GRANTS**

Our funding opportunities have expanded around the globe and span the career spectrum of research, including medical students, residents, postdoctoral fellows and independent investigators.

The AUA administers grants that are awarded to institutions and individuals through the Urology Care Foundation. The AUA has a stringent peer-review process that reflects the highest standards of the National Institutes of Health. Each year, the Foundation grants nearly $2 million in research funding to support training awards, salary stipends and fellowships to promising young investigators.

**EDUCATION AND OUTREACH**

The Foundation dedicates time and effort to raise awareness of urologic health through national public health campaigns and publications. Online and print materials produced by the Foundation are based on information from the AUA's Clinical Guidelines. Our patient-friendly educational tools are designed to promote communication between patients and their healthcare providers. We also publish UrologyHealth extra, a quarterly, award-winning patient focused magazine.
81%

OF EVERY DOLLAR RAISED IS DIRECTLY INVESTED IN UROLOGIC RESEARCH AND EDUCATION PROGRAMS.

2020 Allocation of Funds
Total $3,264,721

(Federal 990 Statement of Functional Expenses)

A copy of the most recent audited financials is available by contacting the Urology Care Foundation. Documents submitted under the Maryland Charitable Solicitations Act are also available from the Maryland Secretary of State, State House, Annapolis, MD 21401 (410-974-5534)
WE’RE ON A global mission WITH GIVING
The Foundation offers a wide range of gifting options through which individuals, corporations and Foundations can help support.
MAKING A DIFFERENCE WITH A PLANNED GIFT
Make us part of your family’s philanthropy. You can plan a gift to us that will only take effect after your other financial obligations are fulfilled.

GIFTS FROM A RETIREMENT PLAN
Leverage your retirement assets to benefit you and your family, reduce federal taxes and support urologic cures far into the future.

GIFTS OF LIFE INSURANCE
Leave a lasting gift by making the Foundation a beneficiary.

GIFTS OF STOCK AND APPRECIATED ASSETS
Take advantage of appreciated securities without incurring capital gains tax.

NAME THE UROLOGY CARE FOUNDATION IN YOUR WILL OR TRUST
One of the easiest ways to leave a legacy.
Visit UrologyHealth.PlannedGiving.org to learn more.

MAKING A DIFFERENCE WITH A DONATION
Make a donation and help the Foundation advance urologic research and education to improve patients’ lives. Consider donating today at UrologyHealth.org/donate.
To learn more about ways to give back and make a difference in urologic research and education, we encourage you to contact our development office.

OUR DONORS

Our mission is to support urologic research and provide the most current, comprehensive and reliable urologic health information for patients and the public and we can’t achieve this mission without the support of our corporate, foundation and association donors. Our volunteers and donors are making a difference every day. We’d like to recognize, with heartfelt gratitude, the gifts made from January 1, 2020 through December 31, 2020.
